**FIG. 13**

FIG. 13 is a perspective view of a surgical instrument assembly 80. The assembly includes a handle 84 with a trigger 86 and a shaft 88. The shaft 88 has a proximal end 90 and a distal end 94. The distal end 94 is connected to a jaw 96, which has a first jaw 102 and a second jaw 102. The jaw 96 is shown in a closed position, clamping a tissue 86.

FIG. 14

FIG. 14 is a perspective view of a medical device 80, such as a catheter, inserted into a patient's body 86. The device includes a distal tip 84, a proximal handle 94, and a flexible shaft 92. The handle 94 features a control knob 96 and a proximal connector 102. The shaft 92 is shown with a cross-section 98.
